Skills

Rust · WebAssembly

TypeScript · Node.js

PostgreSQL · Redis

Docker · Kubernetes

Education

B.S. Computer Science

MIT, 2014

Profile

Software engineer with 10 years of experience building high-performance distributed systems. Specialising in Rust, WebAssembly, and developer tooling. Proven track record of leading cross-functional teams and shipping products used by millions of people worldwide.

Experience

Staff Engineer — Acme Corp

2021 – Present

Led architecture of a real-time data pipeline processing 50 million events per day. Reduced p99 latency by 40% through custom memory allocators and lock-free queues written in Rust.

Senior Engineer — Bright Labs

2017 – 2021

Built and maintained a multi-tenant SaaS platform serving 8,000 customers. Migrated a monolithic Rails application to microservices, cutting deployment time from 45 minutes to under 3 minutes.

Software Engineer — Orion Systems

2014 – 2017

Developed embedded firmware for IoT sensors in C and Rust. Delivered SDK integrations for AWS IoT and Azure IoT Hub adopted by three enterprise clients in the first year of release.
